Summary:

The Department of Data Science and Business Analytics organized a visit to All Saints Home on 16th October 2025, with the objective of providing emotional support and meaningful engagement to the elderly residents. The interaction fostered a compassionate environment where students connected with the residents through conversation, empathy, and shared experiences.

Upon arrival, the students were welcomed warmly by the residents, whose expressions reflected a genuine desire for companionship. Initial greetings soon developed into thoughtful dialogues, during which the residents shared personal stories, family memories, and significant moments from their lives. The students listened attentively, ensuring that the residents felt valued, respected, and emotionally supported.

The cultural segment of the visit added further joy. Students presented familiar songs, encouraging participation from the residents, who joined with soft humming, clapping, and heartfelt smiles. Some residents contributed their own songs and blessings, enhancing the emotional depth of the gathering.

The visit highlighted the profound impact of simple acts of kindness. Beyond spending time, the students offered presence, warmth, and compassion, while in return they received gratitude, life lessons, and encouraging words from the residents.

As the session concluded, the farewell moments were deeply moving. Residents expressed their appreciation through warm gestures, and the students left with strengthened awareness of empathy, social responsibility, and the importance of human connection. The visit stands as a meaningful reminder of the value of caring engagement within the community
